INTER-LAKES TO BE TOBACCO-FREE BY APRIL 15

In keeping with the overall mission to be a community responsive health-care partner that promotes wellness, the Inter-Lakes Health campus will become tobacco-free on April 15, 2010.

The move puts Inter-Lakes in the company of most other health-care organizations across New York, who have also chosen to provide clean-air environments from curb to door for their patients, visitors and staff. The dangers associated with tobacco use – first-hand and second-hand – are well documented, as well as the difficulty people have in extinguishing the habit.

Individuals interested obtaining more information on how to stop smoking should contact the New York State Smokers' Quitline (1-866-NYQUITS).
